

## NISSAN/nismo teams adopt BBS wheels to win back the title in the Super GT GT500 class

Vehicle with new wheel configuration unveiled at 2017 NISSAN/nismo Motor Sports Activities Presentation

The NISSAN Motul Autech GT-R which bears the traditional NISSAN ace number 23, races in the Super GT – GT500 class, which is the pinnacle of Japanese motor sports. In 2017, BBS Japan will provide this vehicle with BBS forged aluminum alloy wheels. This, in addition to the Mola S Road Craftsports GT-R supply continuing from last year, will enable year-long competition via two-team supply from a total of four NISSAN/nismo teams competing for the title.

On stage at the 2017 NISSAN/nismo Motor Sports Activities Presentation, NISSAN team coach Toshikazu Tanaka mentioned that “The GT500 has an obligation to feed back technology to the commercial car market.” In the same way, the performance and reliability of our wheels required for the extreme conditions of racing is incorporated into products for the commercial market, which has resulted in the popular RI-A single-piece aluminum forged wheel with the same design as the racing wheel.

### BBS RI-A

Diamond Silver (DS)

Diamond Black (DB)

Gold (GL)

Matte Gray (MGR)
